OBJECTIVE

As an entry level engineer just finishing my Masters, I would like to pursue a career in cloud engineering, automation, DevOps, and am passionate about building innovative solutions as a DevSecOps Engineer, Cloud Security Engineer, Cloud Engineer, or Solutions Architect. My ability to keep up to date with software/tech combined with my Masters in Cybersecurity has prepared me to contribute to the team's success for designing and managing secure, scalable cloud architectures, implementing Infrastructure as Code, optimizing CI/CD pipelines, and deploying containerized applications using tools like Docker and Kubernetes. Eager to collaborate with dynamic teams to drive organizational success, I am very passionate about SSO IAM solutions, managing the backend for large workloads in a hybrid infrastructure, and cloud architecture.
